 cascobie

Full-stack web developer with a background in financial planning.
As a web developer, I enjoy working on the details of a project that make the end product intuitive to use and great to look at.
I love exploring new programming languages, collaborating with teammates, and I am passionate about life-long learning.

Employment

Sagium
Calgary, AB
Financial Planning Analyst
2018 to 2020
• Evaluated optional plans by identifying outcomes and potential returns.
• Valued assets by appraising current condition; assessing potential.
• Recommended debt structures by analyzing refinancing options.
• Built financial database by identifying sources of information; assembling, verifying, and backing up data.
• Recommended financial actions by assessing options in relation to organization goals.
• Prepared financial reports by collecting, formatting, analyzing, and explaining information.

Print Audit
Calgary, AB
Summer Intern
2017
• Administrative duties: answered incoming calls; taking messages and re-directing calls as required, dealt with email enquiries, arranged appointments; booking meeting and conference rooms, organized travel and accommodation for staff, performed general office management such as ordering stationary.
• Played a major role in coordinating events that encouraged staff participation and fostered team building.
• Assumed Bookkeeping duties while the accountant was away: Processed accounts payable and accounts receivable, posted journal entries, used QuickBooks to assist with the recording of transactions.

Projects

Interview Scheduler
May 2021
Single page application for tracking student's interviews. Allows users to book, edit, and delete interview appointments for the week.
Front-end: HTML, CSS, React
Back-end: Node, Express, PostgreSQL, Axios, Javascript, Git
Test: Jest, Storybook, Cypress

Tweeter
Apr. 2021
Single page Twitter clone. Allows users to post a short message to the page. Uses jQuery to dynamically create HTML elements and Ajax to handle asynchronous requests.
Front-end: HTML, CSS, Bootstrap
Back-end: Node, Express, jQuery, Javascript, Git, Ajax

TinyApp
Apr. 2021
A multi-page, full-stack web application that allows users to shorten long URLs. This app uses cookies to maintain user specific lists.
Front-end: HTML, CSS
Back-end: Node, Express, Javascript, Git, EJS
Test: Mocha, Chai
